...the translation software and temporary licenses and do the processing on their own workstations or servers. This procedure lets security-conscious customers avoid having to **encrypt** and **decrypt** their own files, which can drive up the time and cost of processing.

### How It Works

Setting up an account, downloading the software, obtaining the **license**, and running the translator is a four-step process. We tried it with CIMS-W-Cat, the CATIA-to-SolidWorks translator, and it worked well.

First...and activate the software by checking a box in the plug-in option menu (accessible via the Tools menu from the main SolidWorks toolbar).

The **license**-acquisition routine will be launched as the user tries to open an untranslated file for the first time from within the CAD system. Customers are asked if they want to start their Web browser and surf to the [CADCAM-E.COM](http://CADCAM-E.COM) site, where a **license** for the file will be generated. In the site, the user picks between one of two payment methods: credit card or debiting a **prepaid** account. A **prepaid** account can be established by registering at [CADCAM-E.COM](http://CADCAM-E.COM) and then faxing a purchase order for a specific dollar amount to Compunix.

The hosting...geometry of the file to be processed, and then generates a unique electronic key or fingerprint for that file. After [CADCAM-E.COM](http://CADCAM-E.COM) transfers the **license** file to the customer's computer, the user can translate the original model as many times as desired during the 48-hour period. Customers can...

...various options, including limiting a conversion to a subsection of a model. If, however, a customer changes the geometry of the original part, a new **license** is needed to translate it again.

### Pro/E Encryption

Compunix set up shop in Southfield. ...require a two-stage translation process that's slow. Moreover, using the APIs or neutral standards requires engineers to own and activate a Pro/E **license** that costs a minimum of \$5,995. That approach may be practical for companies with plenty of Pro/E licenses, but it is more costly...
